BASHIR SHAIKH

AWS Cloud & DevOps Engineer

Pune, Maharashtra, India | +91 7498402581 | shaikhbasir469@gmail.com | linkedin.com/in/bashir-shaikh

CAREER OBJECTIVE

Aspiring AWS Cloud and DevOps Engineer with hands-on experience in AWS cloud services, Linux, cloud infrastructure, and web server deployment through academic and personal projects. Eager to apply my technical skills to build secure, scalable, and reliable cloud solutions while continuously expanding my expertise in AWS and DevOps technologies.

EDUCATION

Vishwakarma Institute of Technology (VIT), Pune *2023 – 2027*
Bachelor of Technology (B.Tech) – Information Technology

TECHNICAL SKILLS

AWS	EC2, VPC, IAM, S3, ELB, CloudWatch, SNS
DevOps	Docker, CI/CD
Linux	Ubuntu, Amazon Linux
Web Servers	Apache, Nginx
Programming	Python (Basic), Bash
Tools	Git, GitHub
Networking	TCP/IP, DNS, HTTP/HTTPS, SSH
Database	MySQL

PROJECTS

Elastic Load Balancer (ELB) for High Availability

AWS EC2, Elastic Load Balancer (ALB), VPC, Linux, Apache HTTP Server

- Designed and deployed a highly available web application infrastructure using Amazon EC2 instances within a Virtual Private Cloud (VPC).
- Configured an Application Load Balancer (ALB) to distribute incoming HTTP traffic across multiple EC2 instances.
- Configured target groups, listeners, and health checks to ensure high availability and efficient traffic routing.
- Implemented Security Groups and VPC networking to provide secure communication between AWS resources.
- Verified application accessibility and load balancing functionality across multiple backend web servers.

CloudWatch & SNS Monitoring for EC2 CPU Utilization

AWS EC2, Amazon CloudWatch, Amazon SNS, Linux, IAM

- Configured Amazon CloudWatch to monitor EC2 CPU utilization and created threshold-based alarms.
- Integrated Amazon SNS to send automated email notifications whenever CPU utilization exceeded predefined limits.
- Performed CPU stress testing using the Linux stress utility to validate alarm triggering and notification delivery.
- Demonstrated proactive infrastructure monitoring through automated alerting and performance tracking.

Static Website Hosting on Amazon S3

AWS S3, Static Website Hosting, Bucket Policy

- Hosted a static website on Amazon S3 by enabling static website hosting.
- Configured bucket policies and public access settings to securely host website content.
- Verified website accessibility through the Amazon S3 static website endpoint.
- Applied AWS storage best practices to ensure secure, reliable, and highly available website hosting.

CERTIFICATIONS

- AWS Cloud Quest – Cloud Practitioner
- AWS Cloud Quest – Generative AI Practitioner
- IBM Full Stack Software Developer Professional Certificate (Coursera)

STRENGTHS

Problem Solving • Quick Learner • Adaptability • Team Collaboration • Continuous Learning
